Crisis Summary: US-Iran Conflict Impact:

- **$49M** daily losses across 35 airlines
- **Peak disruption March 1** following Iranian airspace closure
- **79% reroute rate** shows operational resilience
- **Emirates & Qatar Airways** bear 15% of total impact
- **120K passengers** affected daily

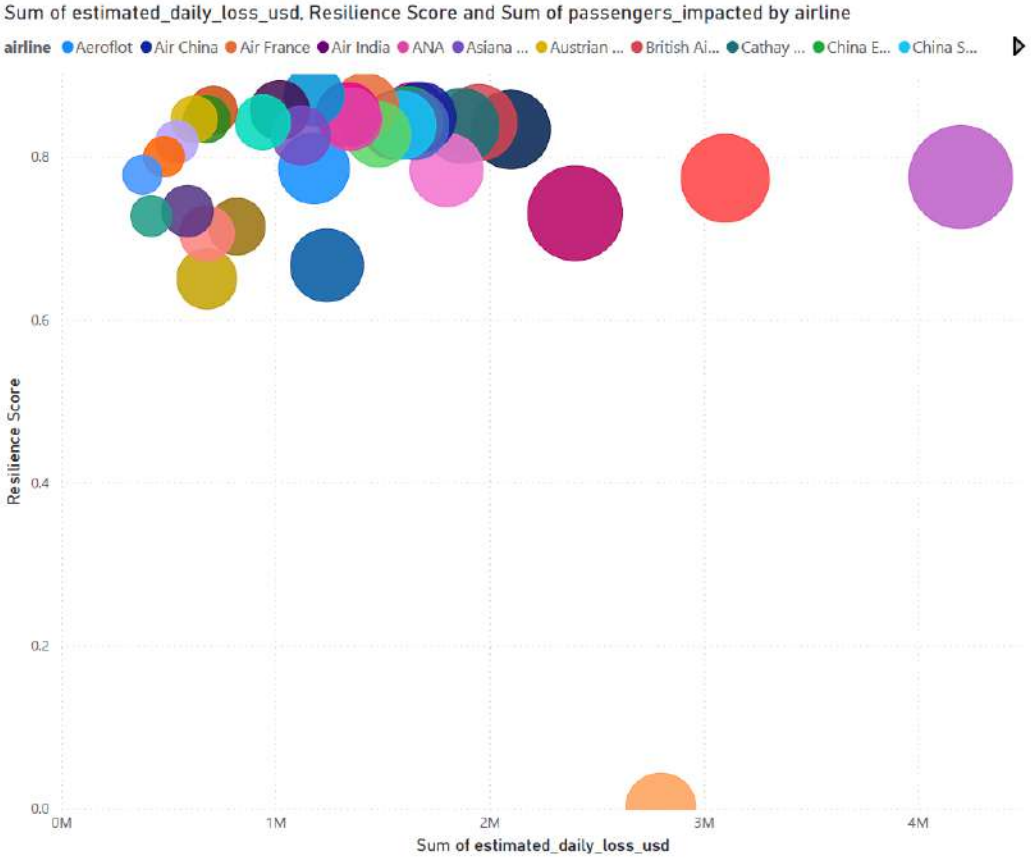
location and severity

severity ● CRITICAL ● HIGH ● LOW ● MEDIUM



Strategic Insight:

- **Emirates & Qatar**: High losses ($4.2M, $3.1M) but 77% resilience—aggressive rerouting
- **El Al**: $2.8M loss, **0% resilience**—geographic trap, total shutdown
- **Industry average**: 79% reroute rate shows strong operational response

El Al is the only airline with 0% resilience, this is due to Israeli airspace being completely closed. This reveals **geographic risk** that no operational excellence can overcome.
